

Continuous Test Report

Generated: 19 July 2026 - 13:43 UTC

Introduction

This report provides an overview of Continuous Testing results, designed to help you monitor availability, performance, and end-user experience across your environment.

Continuous Testing runs a series of tests consecutively over time, repeatedly launching user sessions, executing the configured actions, and collecting results from the end-user perspective. By continuously validating key parts of the user journey, these tests help identify potential issues in your infrastructure before users report them.

The report may include results from a single Continuous Test or a comparison of up to five Continuous Test results, allowing you to review performance trends, detect regressions, and compare outcomes across different runs. It includes key measurements such as EUX metrics, latency, login performance, application measurements, session metrics, and relevant events.

Use this report to understand how users experience your digital workspace, investigate performance changes, and take proactive action.

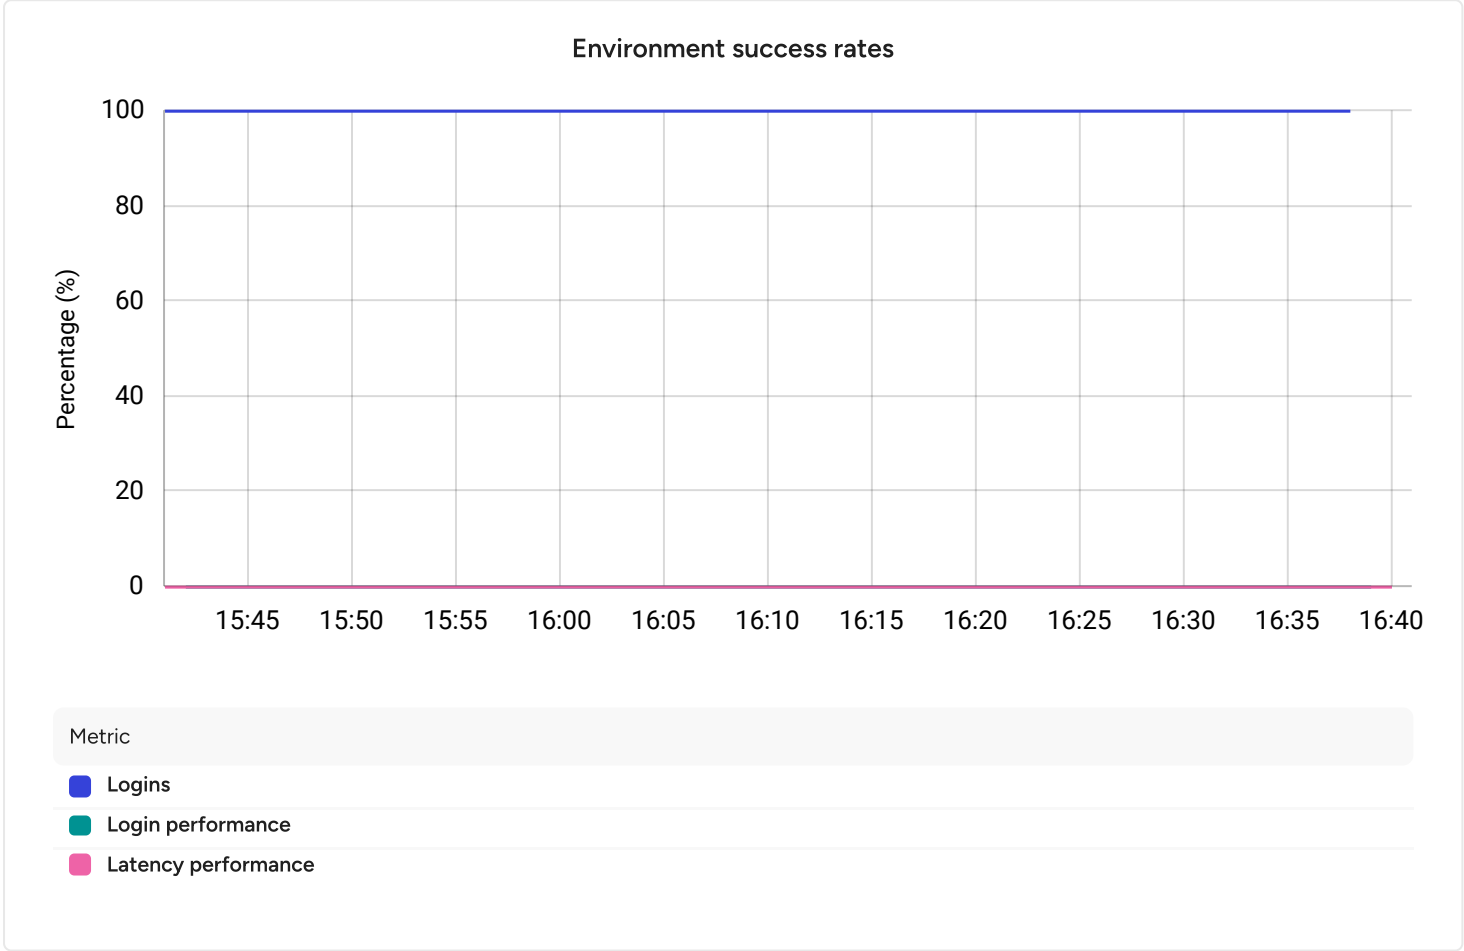

Test details

Test specifics

Name	Value
Product version	99.50.1635
EUX	Enabled
Connector	Microsoft RDS
Launcher group(s)	Launchers 1-2
Account group(s)	Continuous Test Accounts
Schedule	Always on Run 1 concurrent session
Workload	Logon Wordpad MS Edge (new) Custom_timer_notepad Wait 1 second(s) Repeat all steps above Logoff
Description	

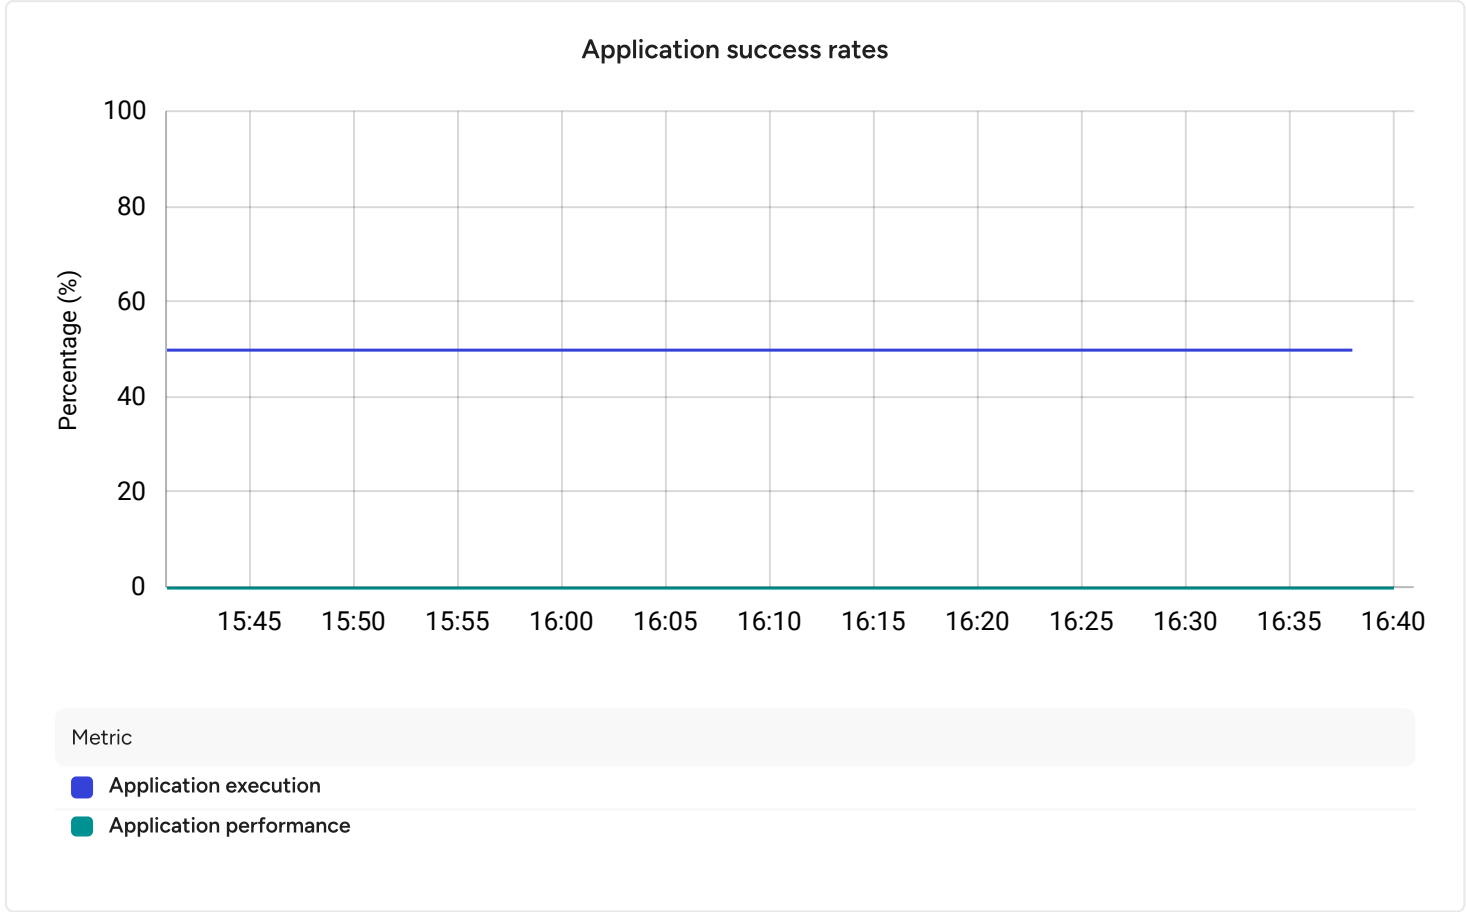

Environment summary

Metric	Failures	Failure rate		Success rate
Logins	0/19 times	0%		100%
Login performance	19/19 times	100%		0%
Latency performance	57/57 times	100%		0%

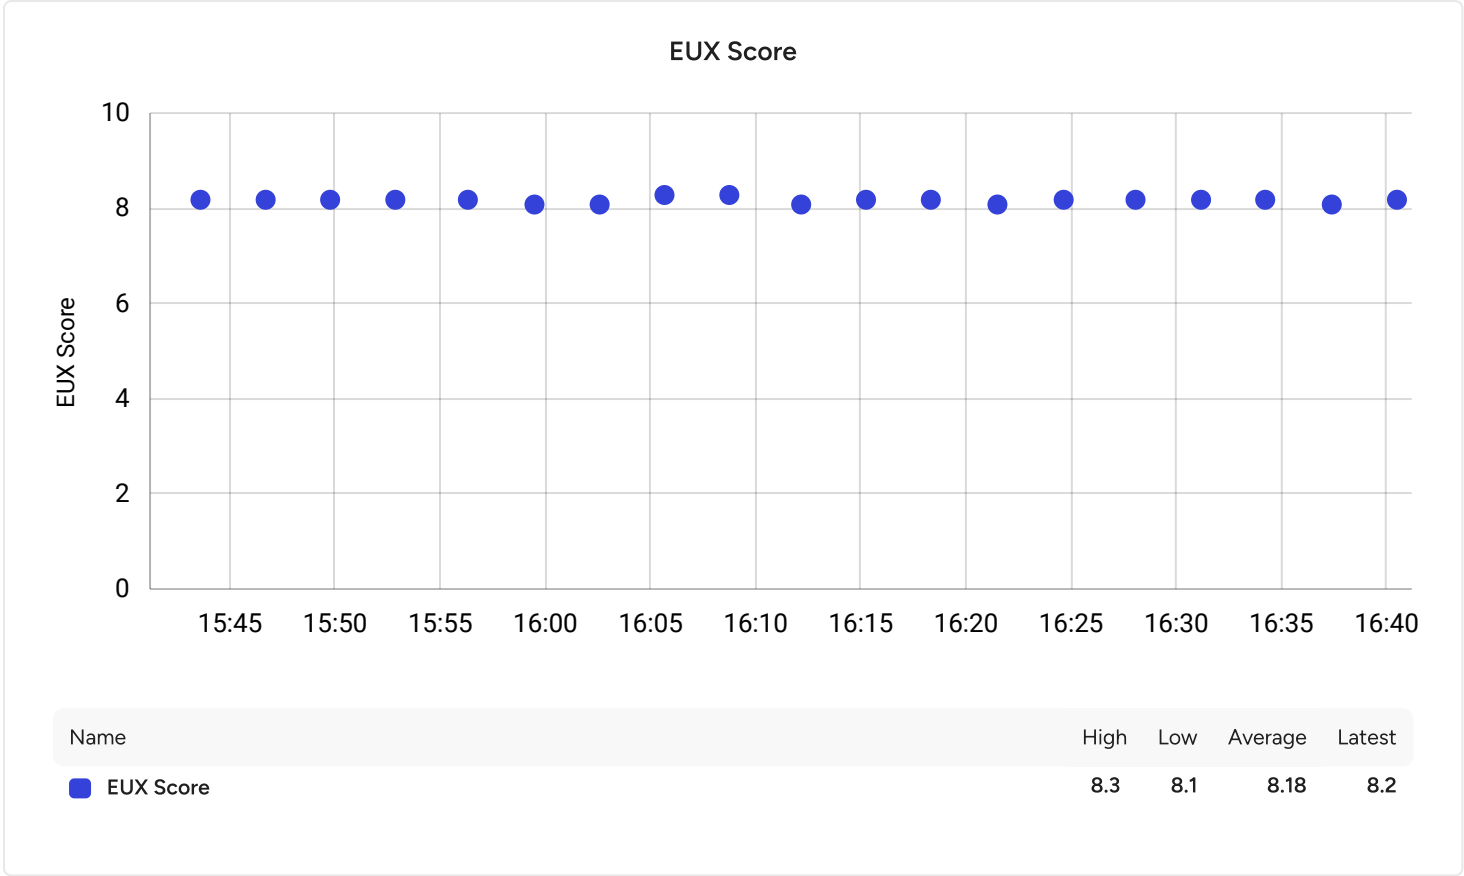

Application summary

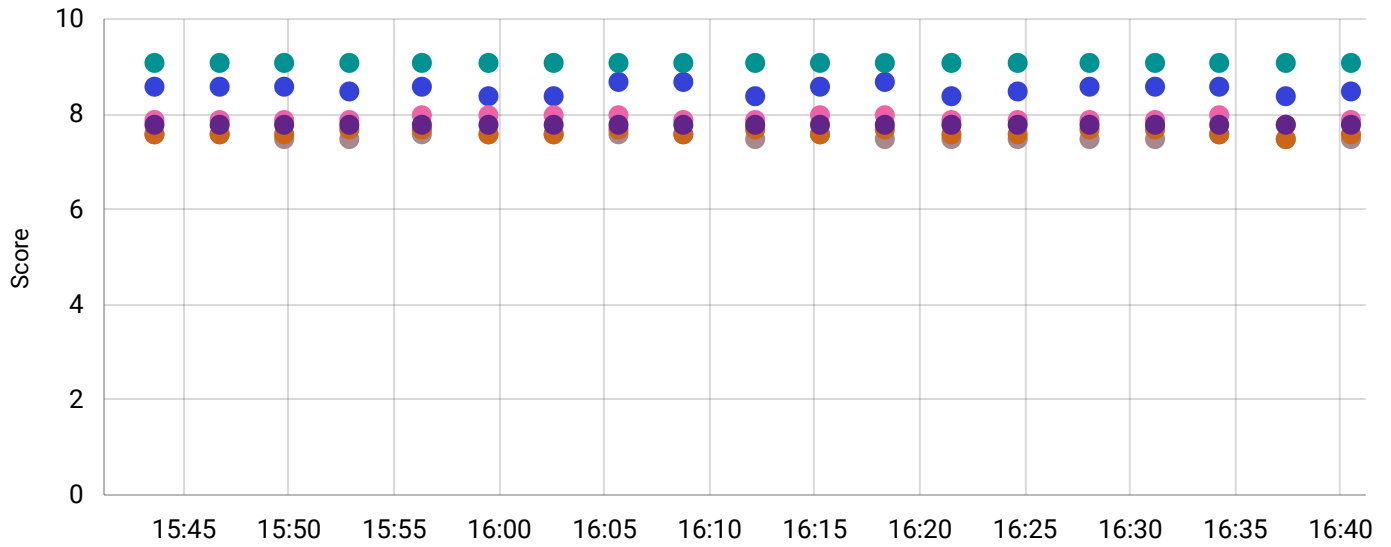

Metric	Failures	Failure rate	Success rate
Application execution	38/76 times	50%	50%
Application performance	38/38 times	100%	0%

EUX Score

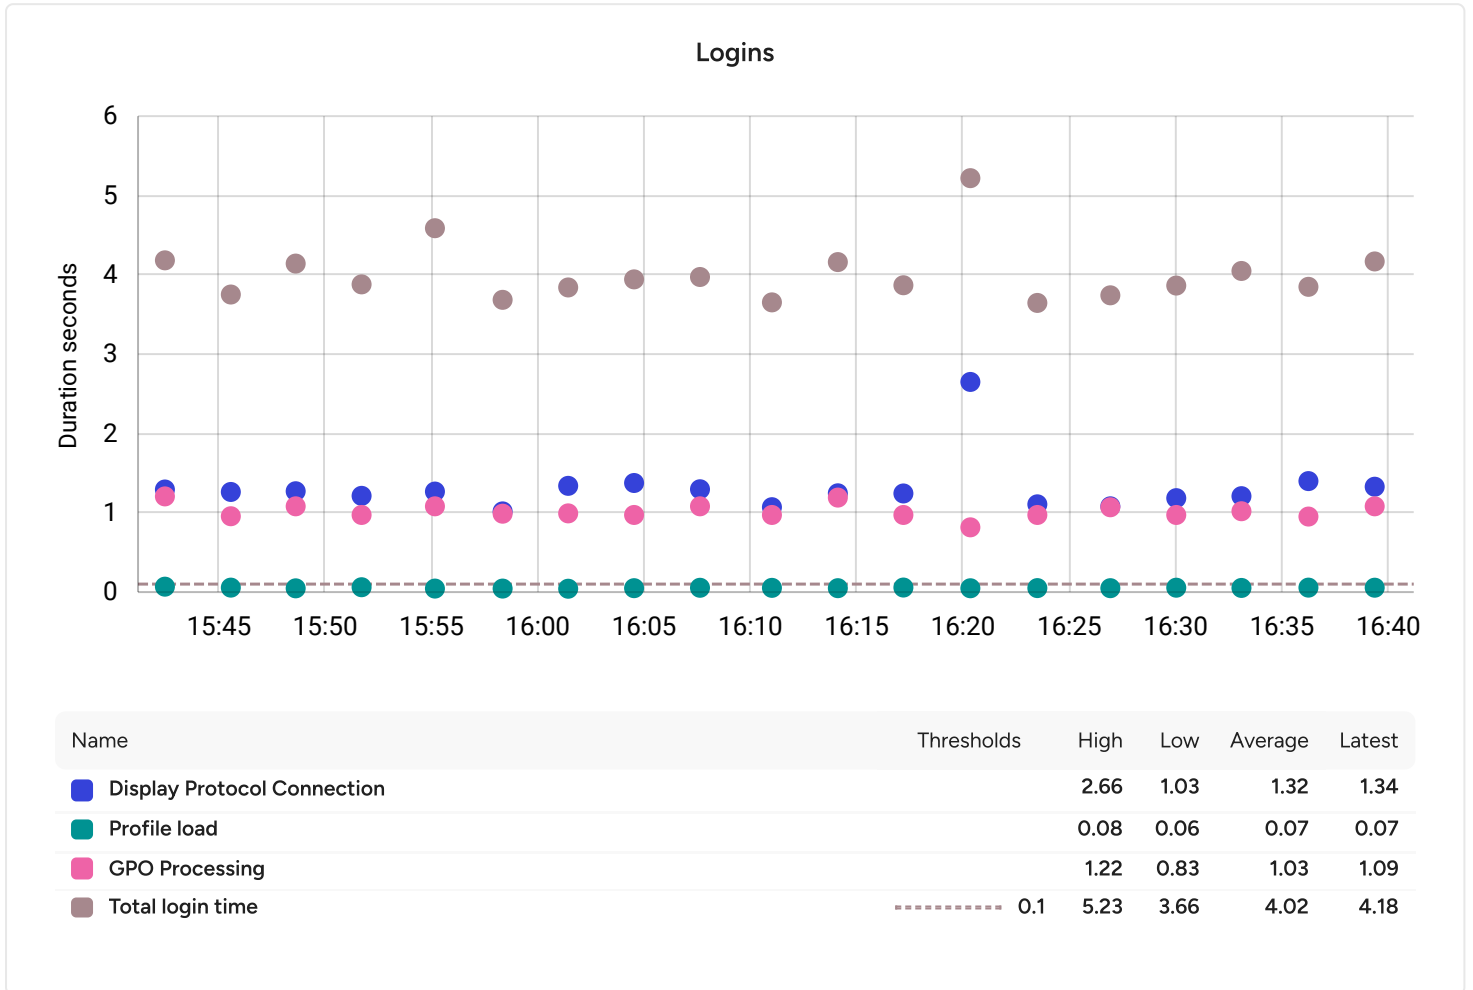

EUX Timers

Name	High	Low	Average	Latest
Generic Application score	8.7	8.4	8.55	8.5
CPU score	9.1	9.1	9.1	9.1
My Documents I/O score	8	7.8	7.93	7.9
Local AppData I/O score	7.6	7.5	7.55	7.5
Mixed CPU I/O score	7.7	7.5	7.63	7.6
User Input score	7.8	7.8	7.8	7.8

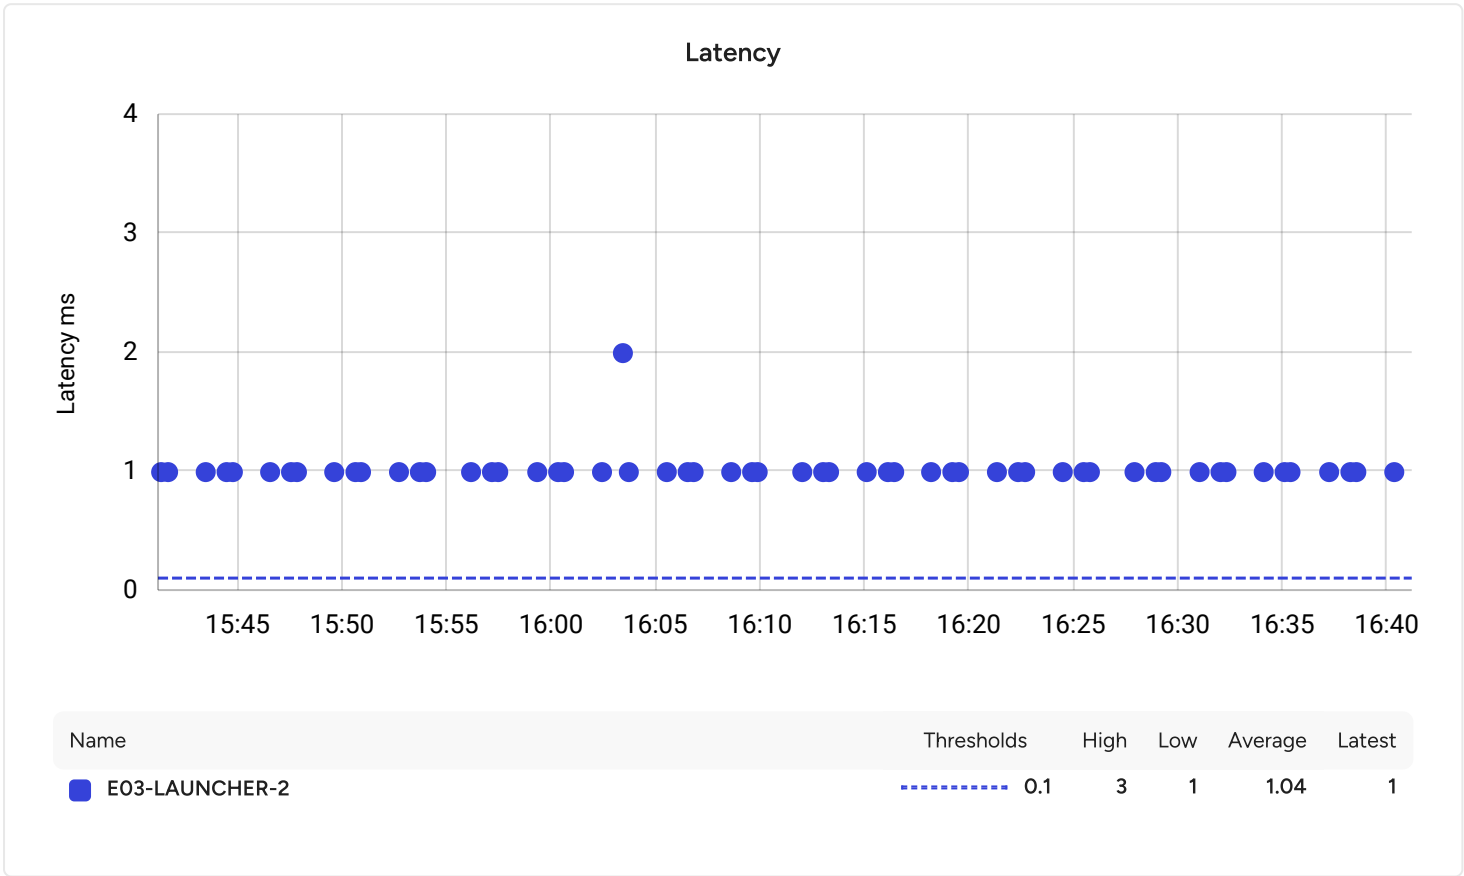

Login Performance

Metric	Failures	Failure rate	Success rate
Total login time	19/19 times	100%	0%

Latency Performance

Metric	Failures	Failure rate	Success rate
Latency	57/57 times	100%	0%

Application Performance

Application	Failures	Failure rate		Success rate
MS Edge (new)	0/0 times	0%		0%
Wordpad	38/38 times	100%		0%

Application Details

Wordpad

Action	Failures	Failure rate	Success rate
Start	38/38 times	100%	0%
